educational flights/year

7 000
helicopter flights/year

Air Traffic Controller in Bern-Belp

Bern Airport is located in the Aare Valley, ten kilometres south of the city of Bern. The airport has evolved into a key engine of the local and regional economy over the past few years. One of Switzerland's most important regional airports, it has air services to various scheduled and charter destinations, and also handles numerous business aviation flights.

The airport is popular for instrument flight rules (IFR) training flights, and as a base for visual flight rules (VFR) operations. It is also the main home of the Swiss government's air transport

service for its VIP and other transportation flights. Furthermore the Swiss Air Force, two flight training schools and the REGA Swiss Air Rescue company all operate helicopters from here.

We look forward to welcoming you soon. Do not hesitate to contact us for more information.
